

## ABC Express release 2.15.0

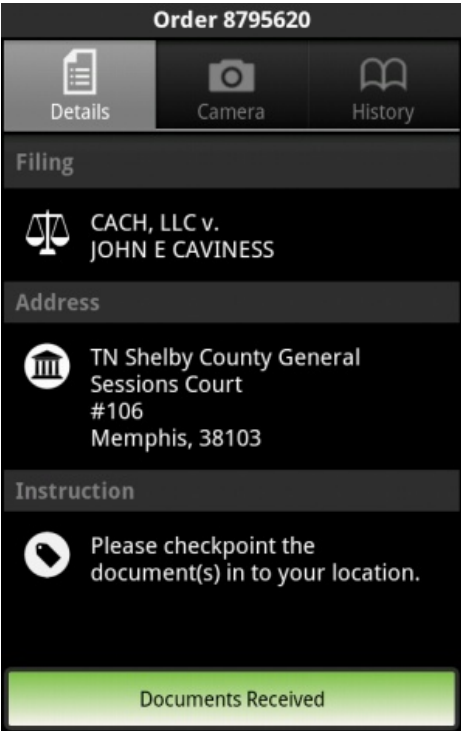

1) The Packing List on the main menu has been replaced by Services, Proofs and Filings. These new menu selections also display a count of the number of orders expected.

2) Each new menu choice leads to a work order list presenting only the type selected ( Service, Filings or Proofs ). The Filings screen includes a unique Court sort option. Nearby Serves now only includes Service work orders.

2) The Filings detail panel has been updated to clarify the filing information and the court address.

2) Filings now have the ability to escalate in urgency to the Notifications panel, much like Services and Proofs.
